About Me

I am enthusiastic and detail-oriented frontend developer with big passion for programming, ability to learn quickly and always stay on top of new technologies. I have 8 month experience in web-development and I want to find a place where I can work with wonderful people and great projects and can grow as a professional, develop, implement cool ideas. I am ready to relocate.

Projects

- **Project Manajement System** - Trello analogue
  Repository link | Deploy link

- **RSLang** - english learning app
  Repository link| Deploy link
  TypeScript, SCSS, ES6 Classes, Webpack, Prettier, ESLint

- **Shelter** - dog shelter website
  Repository link| Deploy link
  HTML, SCSS, JavaScript

Experience

- Mar, 2022 - Jan 2023
  JavaScript/Frontend course + React course
  The Rolling Scopes School, EPAM

  - Studied the theoretical foundations of Git, HTML, CSS, JavaScript, TypeScript

  - Implemented layout of adaptive and cross-browser applications and websites using HTML, CSS and JS

  - Studied the theoretical foundations of Git and applied them in practice throughout the course

  - Learned the basics of NodeJS

  - Solved over 150 JavaScript tasks

  - Studied the theoretical foundations of React, Redux, Redux Toolkit, RTK Query

  - Developed SPA on React using Redux and Tailwind CSS

  - Wrote unit tests using React Testing Library

  - Successfully passed three JS and one React training interviews with EPAM developers

  - During all study worked with the senior developer which helped me improve the quality of the code and improve my skills in JavaScript and React

  - Gained experience in team development. Together with the team developed 2 web applications within 2 months each: RSLang and Project Management System. You can find them in my portfolio
